

## HOW TO CHOOSE A PERFUME?

Choose the type of fragrance or fragrance notes you like. Open the sample and apply a little bit of perfume on the skin or on the test strip. Let them develop their fullness, give yourself time to experience all the richness of the ingredients. In the first few minutes a delicate, vibrant head note bursts out. Then the heart note is revealed to us. At the end we explore the note of depth. Remember that you do not have to choose only one fragrance, you can choose several different ones for different occasions.

## WHAT FRAGRANCE ARE YOU LOOKING FOR?
